

GREENfirst™ Guide

environmentally preferable products for interior spaces

The Laminex Group has always been at the forefront of design and innovation for interior surfaces.

The Greenfirst initiative illustrates our environmental commitment by providing you with a range of products that deliver environmental advantages specifically in relation to Indoor Environment Quality (low formaldehyde emitting products) and the use of sustainable timber.

Key Message:

- Commercially viable and environmentally preferable products
- All Greenfirst products are independently certified by either Environmental Choice New Zealand or Good Environmental Choice Australia

- No loss in design flexibility or functionality
- Easy to identify products that fulfill Green Star New Zealand credits

The two Green Star Rating categories are:

IEQ 14 – Formaldehyde Minimisation – Achievement towards 1 credit point

MAT 8 – Sustainable Timber – Achievement towards 2 credit points

The Greenfirst range is now so extensive it can satisfy a range of interior applications that are aesthetically superior, commercially viable and environmentally preferable.

The Greenfirst range is certified by either ENVIRONMENTAL CHOICE NEW ZEALAND or GOOD ENVIRONMENTAL CHOICE AUSTRALIA
